VALUES:

>PUT PEOPLE FIRST

>BUILD TRUSTED PARTNERSHIPS

>BE CONSTANTLY CURIOUS

>MAKE A POSITIVE DIFFERENCE

Overcast Innovations rose from a need to make buildings more intelligent, sustainable and affordable. We are compelled by our values to meet that challenge head on.

Fresh thinking
creates new
opportunities to
streamline process,
costs and timelines
through innovative
design and
manufacturing
approaches.

Modular by design, Overcast ceiling appliances offer long term flexibility as space needs change and can be modified and updated over time.

THE CLOUD

THE MODULAR GRID PLATFORM

EDUCATION SOLUTIONS

We're creating spaces that give the best learning opportunities and environments for students.

"Every classroom space must be designed for the students in mind. Whether designing for K-12 or higher education, we look at the specific needs of the students being taught and reflect that through our assemblies to create the best space for them."

**-Robb Andrade, Overcast Innovations
Managing Director**

HEALTHCARE AND LAB SOLUTIONS

Overcast assemblies are not just about aesthetics, but the health and needs of occupants and patients.

**"It is so key for life science facilities to be able to build and update their spaces quickly and effectively, these assemblies put a lot of flexibility into the design of these critical spaces."
-John King, McKinstry Senior Business Development Director**

COMMERCIAL SOLUTIONS

We are at the front edge of a bold and exciting shift that is accelerating.

“Overcast’s innovative and flexible Cloud systems were essential in hitting the zero carbon, zero energy, zero cost premium of the Catalyst building by reducing waste, installation time and labor costs. Plus, they look fantastic and have become a focal point for building occupants.”

-Allie Teplicky, Emerald Initiative Real Estate Development Manager

MANUFACTURING

Overcast Innovations attacks inefficiency and waste at every stage of the building design, construction, and operations lifecycle.

We dive deep to understand your project's design intent, goals, building function requirements and performance expectations.

Buildings are getting more complicated all the time, and we want to see which parts we can deliver more efficiently.

The background of the image is a bright blue sky filled with soft, white, fluffy clouds. The clouds are scattered across the frame, with some appearing more prominent than others. The overall tone is clean and fresh.
