# The Cloud

## Smarter Ceilings, Better Spaces

### Reimagine Your Ceiling with Clouds from Overcast

At Overcast Innovations, we're redefining how ceilings are designed—transforming them from static features into strategic assets. Our premanufactured, modular cloud systems seamlessly integrate acoustics, lighting, and building technologies—delivering exceptional design flexibility while reducing cost, schedule, and environmental impact.

Overcast Clouds aren't just ceilings—they're complete, future-ready infrastructure platforms. By consolidating trades into a single, prefabricated installation, our systems typically reduce construction costs by 15% and compress installation timelines significantly. Plus, with adaptable panel designs, you gain the freedom to reconfigure your space over time without disruption.

**Built for sustainability. Engineered for speed. Designed for what's next.**

# Grid Platform Solutions

Transforming ACT Ceilings from Functional to Exceptional

## Elevate Your Everyday ACT Ceilings with the Overcast Grid Platform Solutions

At Overcast Innovations, we're rethinking traditional ACT ceilings —transforming them to include a dynamic, integrated platform that delivers more than just a refined look. Our Grid Platform solutions bring together lighting and building technologies in a prefabricated system, designed to fit seamlessly into all standard grid formats.

Overcast Grid Platform solutions provide a streamlined infrastructure solution that lowers project costs and speeds up installation by reducing on-site trade labor. Flexible, efficient, and future-ready, Overcast Grid Platform Solutions make it easier to maintain and adapt your space over time without disrupting operations.

**Built for performance. Designed for speed. Delivered with precision.**
